

Installation Instruction for Shadow SH 3000 Violin-Transducer with Volume and Tone Control

Content:

Pickup with 3.5mm jack
3.5m shielded plugcable (6,3 mm/3,5 mm),
Volume and tone control unit at chin-holder,
Bonding material,
cable holder,
Turn-rakes

1. Apply an even amount of included adhesive at the underside of the pickup.
2. Press the pickup cautiously on the violin bridge.
3. Mount volume and tone control unit at the same way, you mount a chin-rest.
4. Plug the 3.5mm jack into the "IN" input of the volume and tone control unit.
5. Connect to an appropriate amplifier.

Note:

Piezo pickups and transducers have a very high output impedance. In order to get the optimum sound output we recommend an amplifier with low impedance.
