

Installation Instruction for Shadow SH 420 Sound Hole Pickup

Content:

sound hole pickup with shielded 12 foot instrument cable and 6.3 mm (1/4) output plug

1. Remove strings.
2. Install the pickup mounting spring on to the pickup.
3. Connect the endpin cable or output cable to the pickup output socket.
4. Set the pickup into the sound hole with the mounting spring on the treble side.
5. Compress the spring and lower the pickup into the sound hole and release.
6. Reinstall the strings and retune the guitar.
7. Connect to amplifier.
8. Adjust volume and tone controls as desired.
