

# Installation Instruction for Shadow SH 440 Sound Hole Pickup

**Content:**

sound hole pickup with shielded 12 foot instrument cable and 6.3 mm (1/4) output plug

1. Remove strings.
2. Remove original endpin.
3. Drill a 7/16" (11mm) hole using the original hole as a pilot.
4. Slightly bevel the edges of the hole to avoid cracking the finish.
5. Press the endpin into the hole until it is flush with the body.
6. Install the pickup mounting spring on to the pickup.
7. Connect the endpin cable or output cable to the pickup output socket.
8. Set the pickup into the sound hole with the mounting spring on the treble side.
9. Compress the spring and lower the pickup into the sound hole and release.
10. Reinstall the strings and retune the guitar.
11. Connect to amplifier.
12. Adjust volume and tone controls as desired.
