

Installation Instruction for Shadow SH 980 Arch Top Guitar Bridge with Piezo Pickup

Content:

Arch top ebony bridge with piezo pickup
cable holder
double-sided bonding material

1. Loosen strings and remove the original bridge.
2. Use sand paper or a file to shape the feet of the bridge to match the arch of the guitar if needed.
3. Install the bridge in the location of the original with the output wire exiting toward the tail piece.
4. Attach the output socket holder in a convenient location with the applied double sided adhesive.
5. Connect to amplifier with a standard instrument cable.
